

Business Analysis is a program of study within the **Business, Management, and Administration Career Cluster**. A Career Cluster is a grouping of occupations and broad industries based on commonalities. There are 16 Career Clusters.

Career clusters link what the students learn in school with the knowledge and skills they need for success in college and careers. Business, Management, and Administration Career Cluster prepares learners for careers in planning, organizing, directing, and evaluating business functions essential to efficient and productive business operations.

There are six programs of study in this cluster:

- Administrative and Information Support
- Business Analysis
- Business Financial Management and Accounting
- Human Resources
- Management
- Marketing

Employment Outlook

Management Analyst is an example of a job in this program of study. Management analysts study problems in organizations. They provide ideas and solutions for resolving issues. The number of jobs for management analysts is expected to grow faster than average through the year 2014. Demand for management analysts will come from organizations hiring outside experts to improve their performance. Wages vary by employer and area of the country. Nationally, salaries for management analysts range from \$49,600 to \$90,080 (Career Information System, 2007). In Texas, the salary range is \$32,700 to \$110,000 (O*NET Online, 2007).

Using this brochure

Inside you will find a suggested **program of study** that has lots of helpful information. The model is an example of the types of courses and extended learning experiences that are important for the **Business Analysis Program of Study**. Use this model to plan your course schedule, educational experiences, and career choices.

At the top of the model, you will find specific **career goals** with the corresponding **O*NET code**. The O*NET code is an official classification of jobs and can be used to locate career-related information. Your teacher, counselor, or media center should be able to help you locate further information.

The upper left side of the model highlights the **core courses and career-related electives** in high school that will help prepare you for your career goal. This model is based upon the Recommended High School Graduation Plan and can easily be adapted for the Distinguished Achievement High School Graduation Plan.

The upper right side of the model highlights examples of **extended learning experiences** that can enhance your knowledge and skills for your career goal. You will find examples of curricular activities, such as participation in Career and Technical Student Organizations like BPA or FBLA, career learning experiences, service learning activities, and extracurricular activities.

The lower left side of the model indicates **industry licensures/certifications** and **on-the-job training experiences** that may be available while still in high school. This section also highlights the various levels of **postsecondary education** and examples of **career options** available to you once you have completed that level of education and training.

The lower right side of the model contains examples of **professional associations** available for business professionals. Many of these organizations allow preprofessional membership while enrolled in a postsecondary program. Most organizations have websites which can be easily located by entering the organization name in available search engines.

Thinking about a career as a Business Analyst?

The Business Analysis program of study may be for you! If a business is experiencing problems, the owner might contact a business analyst for help. To understand the problems, they analyze information and create solutions, then make a proposal to the business owner. Look inside to see the suggested coursework and learning opportunities that will prepare you for an exciting and rewarding career.
